

# Proactive Technology Support Management

**Move from reactive to proactive with CoreCare!**

**Do you want fixed-fee IT support services vs. fluctuating monthly fees? Are you tired of being the go to person for daily computer questions? Do you want to spend more time on your core business, rather than technology headaches?**

**CoreCare**

Reduce your headaches and improve staff and operational efficiencies with CoreCare!

Through state-of-the-art monitoring and management tools our certified engineers protect and optimize your network 24x7x365.

You will also save yourself hassles and time reviewing and installing software and security updates—the CoreCare service will monitor and install these for you. Installation occurs during your non-peak business hours to avoid bogging down network resources.

Utilizing the proactive tools of CoreCare gives you more time to spend on your business rather than dealing with technology headaches. You gain a proactive “Virtual IT department” of professionals that watch your network and provide remote and onsite support. Your staff can call CoreTech with questions and issues; relieving you from the daily triage work. In addition, your Virtual CIO will meet with you to ensure your technology aligns with your business goals. So, not only are your daily needs taken care, your long-term plans are as well!

**We recognize your business has unique needs. For this reason, CoreTech customizes our proactive managed services packages for your business. Call us today!**
